

```
import { Injectable } from '@angular/core';
import { HttpClient } from '@angular/common/http';
import { Observable } from 'rxjs';
@Injectable({
  providedIn: 'root'
})
export class LoginService {

  constructor(public httpClient:HttpClient) { } // DI for HttpClient

  // by default all httpClient return type json consider

  signIn(login:any):Observable<string> {
    return
    this.httpClient.post("http://localhost:9090/login/signIn",login,{responseType:'
    text'});
  }
}
```
