```typescript
export class Citizens {
    constructor(
        public aadharnumber:number,
        public name:string,
        public dob:Date,
        public address:string,
        public password:string,
        public emailid:string,
        public phonenumber:number,
        public gender:string,
        public status:string,
        public issue_date:string
        ){}
}
```
